Design Features and Benefits

Simple Sturdy Construction

- Designed with longevity in mind Wolftek has opted for over sized pins, bushings and mechanical parts making the Smart Sweep a lasting investment.
- Maintenance Parts are readily available and not proprietary so there will be no lost time waiting for specialty parts.
- Reduced maintenance costs.

Calculated Power for Application

- Wolftek will calculate the appropriate horsepower and torque needed for your specific applications to lower component, install and maintenance costs.
- Allows for the best VFD matching to reduce overall power consumption.

Easy To Install/Made to Order

- The Smart Sweep is made modular so that install is fast and efficient to avoid disrupting your production.
- Both two and three arm configurations are available to suit your unique space.
- Horizontal or Vertical Crank options for install flexibility.
- Actuator retrofit option allows you to use your existing arms but gain the benefits of a fully electric system.

Smart Sweep VS Hydraulic & Air

The Smart Sweep Electric Log Sweep System offers many benefits over older hydraulic and compressed air systems.

- Energy savings and less strain on your compressors.
- Extremely precise kick timing as there is no chance of lacking line pressure.
- The Smart Sweep is isolated from all other equipment so your other systems that can only run on hydraulic or air systems will benefit.
- Electric Sweep System is not affected by nature while hydraulic lines are affected by cold temperatures leading to sluggish operation.
- No chance for oil leaks or air line leaks.
- Drastically reduced noise levels make work area safer and more comfortable.
